Hello Farren,

Apologies for taking so long to review the 2014 NEI v.2 Oregon nonpoint/nonroad/onroad data for the RHPWG; things have been a little hectic for me this past month (!) Regarding the NEI data review, since Oregon went through EPA's QA/QC procedures for the 2014 NEI, we believe that the EPA data is accurate for Oregon nonpoint, nonroad and onroad sources. Just to be on the safe-side, I did a little range-checking on the data you posted to the WIKI, shown in the charts below: Oregon looks comparable to Washington, which is a good sign to me.

Please send me an email or give me a call if you think more in-depth QC is needed for the RHPWG effort.
Thanks again,
Chris
