Hi Tom,

I have our EI person reviewing the estimates including the 168% increase in unpaved roads between 2011 and 2014, perplexing. We don't have any time relevant, specific local data (only a 2009 PM10 NAA inventory) to supplement the NEI at this point but will send an email mostly likely opting for #1 after we've walked through it.

Mike

Hi, all – I am writing to seek a response from each of your agencies about using the 2014 NEIv2 emissions data as compiled by EPA from your reports and finally released earlier this year. For the WRAP Workplan, we have been reviewing data from the 2014 NEIv2 dataset via conference calls, our work is documented on a wiki page at: [Western U.S. regional analysis - 2014 NEIv2 Emissions Inventory Review for Regional Haze Modeling](#).

At this point we want to make sure that the 2014 data from each of your agencies reported to EPA is the best available dataset for regional analysis. We recently learned that Pima County, AZ had a more detailed and complete 2014 emissions inventory that had not make it into the 2014 NEIv2 dataset.

Please reply to me, Farren Herron-Thorpe, and Rodger Ames with information about: 1) “our data is okay to use as is”, or 2) “no, my agency has alternate data that should be used”.

Your attention to this over the next couple of weeks would be very much appreciated.

Thank you in advance.
