Subject: 2014 and 2018 Inventory for WRAP

Hi Tom,

Thanks for taking the time to talk with Martin and I about the inventory needs. Here is what we discussed:

1. The NEI inventory that WRAP currently has differs significantly from what CARB submitted to EPA in 2014. CARB will provide WRAP a replacement data set when we supply the forecast to WRAP.
2. CARB will supply 2014 and 2028 inventory data files to WRAP by the middle of February 2019. These files will be post-processed to the standard that CARB's inventory staff supplies to CARB's modeling staff. The post-processing is the initial step to converting the inventory files to SMOKE ready files. They will require additional post-processing to be SMOKE ready. Leo's group can provide guidance to WRAP.
3. WRAP will use the current NEI inventory they possess for California as a placeholder for their modeling platform until CARB supplies the replacement data.
4. As we discussed, the control dataset that will be used for the forecast is the adopted rules as of November 2015.

Let me know if I missed anything we discussed or if you have follow-up questions.

Thanks,

Stephanie Huber, Ph.D., Manager
