Hi Rodger,

Please post the attached notes to the EI wiki. We had very little activity on the call so I don't think it's worth sending out to the group for comments. I filled in more of the minor-source reporting chart and put it in the notes... just a few more states to go.

Also, I got approval from Oregon (Wes Risher by phone) to use the revised unpaved road dust numbers that Washington developed for them. I've attached their updated emissions and the resultant map. It's not unusual for Washington to do emissions estimates for Oregon since we manage the modeling emissions inventory for AIRPACT (NW-AIRQUEST).

Thanks,
