

Workgroup plans moving forward: Getting to 2016 version 1 and other topics

YEAR 2016 EMISSIONS MODELING PLATFORM PURPOSES

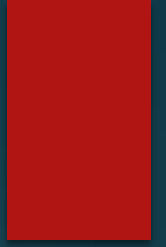

J. VUKOVICH (USEPA)

MAR 7, 2019

General Plans for coming months

- ▶ Late March/early April: make another Smartfire2/BlueSky run using recently acquired data and known issues that can be improved (may call this pre-v1 run)
 - ▶ USFS FACTS database
 - ▶ DOI NFPORS database
 - ▶ NC and KS changes from beta approach
 - ▶ New Jersey data coming soon
- ▶ April: Incorporate GA day-specific ag burn data into v1
- ▶ April 4th workgroup call: Discuss alternate future-year fire inventories (Tom Moore and Matt Mavko)
- ▶ Late April: provide results from latest Smartfire2/Bluesky run (pre-v1) to workgroup in time for discussion during May's call
- ▶ May: More quality assurance of pre-v1 and come up with list of tweaks/edits/corrections to do (including look at fuels labeled "Urban"; any feedback from air quality model evaluation)
- ▶ Late May/June: Make the tweaks/edits/corrections where possible

Still time for QA of beta and submitting new data

- ▶ Workgroup members are encouraged to examine 2016 beta emissions
- ▶ States or other organizations can still submit fire activity/information data or edits to previous submitted data

Fire Emissions Processing at High-Level for possible 2016v1
