

Pathway to 2016 version 1 for Oil and Gas sources: current plans and discussion

Jeff Vukovich USEPA March 11, 2019

Very likely updates to inventory for 2016v1

- Base year updates
 - Pennsylvania non-point
 - Conventional and unconventional sources computed separately
- Future year updates
 - Another year of historical production data available (2018)
 - AEO 2019 Reference case vs. other cases

Other possible updates to inventory for 2016v1

- Base year updates
 - All workgroup members encourage to QA the beta version
 - Could find issues that need changes
 - Can we separate out oil and gas activity on tribal lands for non-point?
- Future year updates
 - Can we do better spatially instead of Oil and Gas Supply Region?
 - Oil and Gas play AEO tables are available (basin level but only for some basins)
 - Are we capturing all controls? And its impact on emissions?
 - Other?
